

If the Nephilim existed, where are the giant remains?

Harris KAKOULIDES, Pastor and Web Minister (2005-present)

Answered Sep 16, 2021 · Author has **1K** answers and **96.4K** answer views

Every country or among every people one would find stories about Giants which give evidence that there was these Nephilim . We have found foot prints of Giants:

India

South Africa

In America Giant foot prints with dinosaurs

Paluxy River basin in North Texas, 45 miles southwest of Fort Worth.

How can these giant foot prints be explain?

What happened to the remains of the Giants ?

HARRISBURG TOPICS.

No More Apportionment Legislation to be Attempted This Session.

THE HIGH-LICENSE QUESTION

Opposition Developing to Quay's Candidacy. Longenecker in the Field.

Special Correspondence of THE TIMES.

HARRISBURG, May 30.

With the vetoes of the Governor on the Congressional and Legislative bills vanishes the prospects of apportionment at this session, as the Legislature has made preparation to adjourn on the 12th of June and is not likely to alter it. Like the laws of the Medes and Persians, once

MA, SUNDAY MORNING, MAY 31, 1885.

A NOTABLE OPERA.

**of Cleopatra Woven Into Song—A
Posthumous Work by Masse.**

Correspondence New Orleans Picayune.

Opera Comique has given us a new
posthumous one by Victor Masse, whose
"Virginie" is well remembered. It is en-
titled "Nuit de Cleopatre," is in three acts and
the libretto has written the words, taking his
inspiration from a "Nouvelle" by Theophile Gautier.
The libretto is barren of local color there is
no plot and several morceaux are sure
to be exceedingly popular. The first act shows us
the Nile, temples, the Sphinx, a statue
of palm trees. Young girls are bringing
the foot of the goddess and singing a hymn
to her. Nambounha mourns over the strange
death of her son, Manasses, the fisher and confides
him to Charmion, now an attendant on the
queen. Formerly the playmate of Manasses,
she loves Manasses, but the latter has
made passion for Cleopatra, spends
his time wandering around the palace and his-
sing to catch a glimpse of her. The royal
queen, with women and musicians, passes along
the palace steps, carrying long-
Cleopatra to sing an air and to allow Manas-
up in his boat. In the next act we are in
the hall of the palace, where the Queen
is bored by the efforts of everybody to

Recently Arrested.**

A NEFARIOUS PLAN OF ESCAPE

**The Criminal's Marriage to Allie Ackerman
and Her Part in His Misdeeds.**

One of the best-known counterfeiters, known
in thieves' jargon as "Koniackers" and "Coney
men," is Ben Boyd. This clever individual, who
has lately been arrested and his kit of tools and
specimens of finished and unfinished work con-
fiscated, was born in Cincinnati in the year 1834.
His father was a wealthy engraver and Ben
learned the art with a view to carrying on the busi-
ness of his father in a respectable and reputable
manner. Cincinnati has always been a favored
haunt for counterfeiters, being a sort of cen-
tral spot for meeting and for circulating the
"queer." About the time Ben was completing
his studies at the Cincinnati College, he met

his study of the art of engraving he fell in with
"Nat" Kinsey, a counterfeiter of the most suc-
cessful and daring kind and a very superior
cutter.

Through this man Boyd soon made the ac-
quaintance of the most noted coney men of the
time and he plied his art so well that in 1865 he
was arrested with Pete McCartney, known
among the fraternity as the King of the Koni-
ackers, and committed to jail at Springfield, Ill.
The bills counterfeited, which led to this arrest,
were fifty dollar, ten dollar and twenty
dollar United States Treasury notes to the
amount of some \$25,000. Boyd managed to
escape from jail and, by surrendering to the
government a counterfeit plate, secured the re-

ERIE COUNTY GIANTS.

Skeletons of Men Ten Feet High Found in a Cave.

ERIE, May 30.

"Why, this man was ten or twelve feet high!"

"Thunder and lightning!" exclaimed Farmer Porter in astonishment. The first speaker, who has won local distinction as a scientist, reiterated his assertion.

J. H. Porter has a farm near Northeast, not many miles from where the Lake Shore Railroad crosses the New York State boundary line. Early this week some workmen in Mr. Porter's employ came upon the entrance to a cave and on entering it found heaps of human bones within. Many skeletons were complete and specimens of the find were brought out and exhibited to the naturalists and archaeolo-

by those of giants.

The entire village of Northeast was aroused by the discovery and to-day hundreds of people from this city took advantage of their holiday to visit the scene. It was at first conjectured that the remains were those of soldiers killed in battle with the Indians that abounded in the vicinity during the last century, but the size of the skulls and length of the

...g bones disproved that theory. So far about a hundred and fifty giant skeletons of powerful proportions have been exhumed and indications point to a second cave eastward, which may probably contain as many more. Scientists who have exhumed skeletons and made careful measurements of the bones say that they are the remains of a race of gigantic creatures, compared with which our tallest men would appear as pigmies. There are no arrow heads, stone hatchets or other implements of war with the bodies. Some of the bones are on exhibition at various stores. One is as thick as a good-sized bucket.

What happened to those 150 Giant skeletons?

The Sunday Times said Even the scientist believed these to be Giants. Could Evolutionist be hiding the facts so we would accept their ideology and reject the Bible as true?

These were not the only ones found

SAN ANTONIO EXPRESS

Beach Giant's Skull Unearthed By WPA Workers Near Victoria

Believed to Be Largest Ever Found in World; Normal Head Also Found

That Texas "had a giant on the beach" in the long ago appears probable from the large skull recently unearthed in a mound in Victoria County, believed to be the largest human skull ever found in the United States and possibly in the world.

Twice the size of the skull of normal man, the fragments were dug up by W. Duffen, archaeologist, who is excavating the mound in Victoria County under a WPA project sponsored by the University of Texas. In the same mound and at the same level, a normal sized skull was found. The pieces taken from the mound were reconstructed in the WPA laboratory under supervision of physical anthropologists.

A study is being made to determine whether the huge skull was that of a man belonging to a tribe of extraordinary large men or whether the skull was that of an abnormal member of a tribe, a

case of giantism. Several large human body bones also have been unearthed at the site.

Marcus B. Goldstein, physical anthropologist employed on the WPA project, formerly was an aide of Ales Hrdlicka, curator of the National Museum of Physical Anthropology.

Finds made through excavations in Texas are beginning to give weight to the theory that man lived in Texas 40,000 to 45,000 years ago, it is said.

STAMP SOCIETY MEETS

San Antonio Philatelic Society will hold its first meeting of 1940 at the Y. M. C. A. at 8:30 p. m.

GIANT SKULL—Believed to be possibly the largest found in the world, the human skull shown on the right was recently unearthed in Victoria County by Texas University anthropologists. The other two are of normal size.

Monday, when a house of rare stamps will be shown by collectors in this vicinity. New officers of the society are Norman H. Brock, president; E. A. Tur-

ner, vice president; L. F. Fields, secretary and treasurer, and Edward Albach, reporter. Both the president and vice president were re-elected.

STRANGE SKELETONS FOUND.

Indications That Tribe Hitherto Unknown Once Lived in Wisconsin.

Special to The New York Times.

MADISON, Wis., May 3.—The discovery of several skeletons of human beings while excavating a mound at Lake Delavan indicates that a heretofore unknown race of men once inhabited Southern Wisconsin. Information of the discovery was brought to Madison to-day by Maurice Morrissey, of Delavan, who came here to attend a meeting of the Republican State Central committee. Curator Charles E. Brown of the State Historical Museum will investigate the discoveries within a few days.

Upon opening one large mound at Lake Lawn farm, eighteen skeletons were discovered by the Phillips Brothers. The heads, presumably those of men, are much larger than the heads of any race which inhabit America to-day. From directly over the eye sockets, the head slopes straight back and the nasal bones protrude far above the cheek bones. The jaw bones are long and pointed, bearing a minute resemblance to the head of the monkey. The teeth in the front of the jaw are regular molars.

There were also found in the mounds the skeletons, presumably of women, which had smaller heads, but were similar in facial characteristics. The skeletons were embedded in charcoal and covered over with layers of baked clay to shed water from the sepulchre.

GIANT SKELETONS FOUND.

Archaeologists to Send Expedition to Explore Graveyards in New Mexico Where Bodies Were Unearthed.

Special to The New York Times.

LOS ANGELES, Cal., Feb. 10.—Owing to the discovery of the remains of a race of giants in Guadalupe, N. M., antiquarians and archaeologists are preparing an expedition further to explore that region. This determination is based on the excitement that exists among the people of a scope of country near Mesa Rico, about 200 miles southeast of Las Vegas, where an old burial ground has been discovered that has yielded skeletons of enormous size.

Luiciana Quintana, on whose ranch the ancient burial plot is located, discovered two stones that bore curious inscriptions, and beneath these were found in shallow excavations the bones of a frame that could not have been less than 12 feet in length. The men who opened the grave say the forearm was 4 feet long and that in a well-preserved jaw the lower teeth ranged from the size of a hickory nut to that of the largest walnut in size.

The chest of the being is reported as having a circumference of seven feet.

Quintana, who has uncovered many other burial places, expresses the opinion that perhaps thousands of skeletons of a race of giants long extinct will be found. This supposition is based on the traditions handed down from the early Spanish invasion that have detailed knowledge of the existence of a race of giants that inhabited the plains of what now is Eastern New Mexico. Indian legends and carvings also in the same section indicate the existence of such a race.
